

Avaya one-X® Deskphone, 9630G IP Telephone

Avaya one-X® Deskphone is a family of next-generation IP telephones that delivers a new and unique communications experience to drive increased productivity.

The Avaya one-X Deskphone Edition solution family features an intuitive user interface which helps to make users proficient and confident in performing common telephone tasks such as setting up a conference call or completing a transfer. With brilliant audio quality, it's much easier to hear and understand other people which speeds business while reducing fatigue and stress. Avaya one-X Deskphone models now support voice commands for speech based dialing, and allow workers to dial personal contacts stored on the phone or a USB memory stick. The 9600 Series deskphones are built with future growth and enhancement in mind, with many modular add-ons that can be added as they are needed — protecting investments and leading to improved total cost of ownership. The new telephones also feature a very stylish professional design, including support for customized display screen saver images and custom faceplates with company logos.

Avaya one-X is a portfolio of communications solutions which deliver a powerful and consistent communications experience for the end user — across a variety of devices and interfaces. Avaya one-X solutions

provide streamlined access to Intelligent Communications, to drive productivity and competitive advantage.

Smart, sleek, stylish and highly functional, the Avaya 9630G IP Telephone delivers advanced communications capabilities — high definition audio, an integrated WML application interface, one-touch access to Avaya Aura™ Communication Manager mobility or forward features — in a solution designed for those who are absolutely dependent on voice communications for their business operations.

An embedded speech recognition engine within the Avaya 9600 Series deskphones allows for dialing of contacts by simply speaking the person's name. For those contact entries with more than one number (work, home), the user can specify "call John Smith at work" and the 9630G is intelligent enough to make it happen. For workers on the go, a USB stick can be used to log into a phone and store personal contacts. When the USB is inserted into a 9600 Series deskphone, it logs the user in and allows users to speech dial any of the up to 250 personal contacts supported by the phones.

The Avaya 9630G IP Telephone supports higher quality wideband audio in the handset, and headset as well as the speakerphone,

which provides crystal clear audio with the elimination of background noise. The backlit display and intuitive interface simplifies access to advanced Avaya Aura™ Communication Manager features — such as simultaneously managing multiple calls and selectively muting and dropping conference call participants. And, with its dual position flip stand, the 9630G makes a smart-looking addition to any desk.

Through its integrated web browser and application interface, the Avaya 9630G supports productivity enhancing phone applications such as corporate directories and integration with Microsoft Outlook calendars.

Workers on the go will appreciate the convenience of the Avaya 9630G's forwarding button, which provides one-touch access to Avaya Aura™ Communication Manager mobility features.

The 9630G model, provides built-in Gigabit Ethernet support with an energy efficient PoE Class 2 rating.

Standard color faceplates supported with all 9600 models. In addition, custom designs including company logos are also supported.

And keep in mind:

Improved total cost of ownership: The Avaya 9630G supports a portfolio of telephone modules, adapters and accessories such as wideband audio headsets. Adapters for Gigabit Ethernet and Bluetooth are now available, allowing for flexible and cost effective enhancements and investment protection.

Security and reliability: With enhanced protection against denial of service attacks and support for 802.1x, LLDP as well as improved VLAN separation, the Avaya 9630G delivers the high level of security and reliability that you've come to expect from Avaya.

Key Features

Hardware

- Backlit display — 3.8" diagonal QVGA quality gray-scale pixel-based with adjustable display angle
- Six line appearance buttons with LEDs
